

Company Profile: y-consultancy

Providing Water for Human Progress

Y-consultancy is a management consultancy company for the Water sector that conducts business worldwide. We assist decision makers in developing and implementing sound strategies and action plans to successfully address the issues that really matter.

We aim at turning adversity into opportunities. Efficient solutions for such issues require an appreciation that every project is unique. Our knowledge and experience acquired globally is applied at local level

Our success is driven by our people and their unrelenting focus on delivering results the right way—by operating responsibly, executing with excellence, applying innovative technologies and capturing new opportunities for profitable growth. We provide consultancy services through the entire Water chain, from Integrated Water Resources Management to Water Supply and from Sanitation to Flood Management.

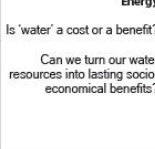

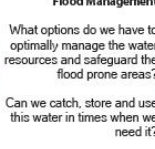

Company Roots

We are a young and highly dynamic firm that was only established in March 2011, in Amsterdam, the Netherlands. We took on the name y-consultancy because we ask the right questions and we focus on the critical financial, operational, technical and organisational aspects that matter and can take you a step further.

Our mission is to be a strategic partner to provide you with the most appropriate solutions and advise on the best way forward to grow and excel to the next level and beyond. We want to have satisfied customers that are able to exploit the opportunities available.

Our services include strategy development and strategic planning, project management and change (adaptation) management.

Global Scope

 <p>Coastal Protection</p> <p>Can the coastal defense protect us from the next storm?</p> <p>Do we need a hard structure or can we use soft measures and create proper resilience to protect our coastal zone?</p>	 <p>Irrigation</p> <p>Is there enough fresh water for the upcoming dry season - if not then how to prioritize?</p> <p>Can we further optimise our efficiency and increase our yield?</p>
<p>IWRM</p> <p>Water resources management is an expensive, non-tangible necessity for many governments. Our strategies turn Water into an asset that delivers real added value for all stakeholders.</p> 	 <p>Water Supply & Sanitation</p> <p>How to provide everyone with proper sanitation facilities and reliable drinking water, 24/7?</p> <p>How to monetise on waste and introduce private financing in sanitation?</p>
<p>Energy</p> <p>Is 'water' a cost or a benefit?</p> <p>Can we turn our water resources into lasting socio-economical benefits?</p> 	<p>Flood Management</p> <p>What options do we have to optimally manage the water resources and safeguard the flood prone areas?</p> <p>Can we catch, store and use this water in times when we need it?</p> 

Within three months of existence our highly skilled global workforce already consists of 14 persons and is growing.

Our services range from strategy development and strategic planning to socio-economic and financial studies and from resettlement and institutional aspects to project management.

We focus on:

- Natural Resources Management like IWRM, ICZM, flood management, irrigation, etc.
- Water supply & sanitation
- Coastal development
- Renewable energy (hydro, wave energy, offshore wind)

Our marketing network focuses mainly on Southeast Asia and our French speaking staff enables doing business in West Africa.

Environment

As a company and as individuals, we take great pride in contributing to the communities where we live and work. We care about the environment and are proud of the many ways in which our employees work to safeguard it.

We recognize that the world needs all proper water management, clean water supply and good sanitation to be able to develop. That's why our employees work daily to deliver the most basic good to every one: Water.
